

# Health and Safety Statement..

Rehability UK cares about health and safety for everyone, including those we support, our staff, and the community. We want everyone safe and happy.

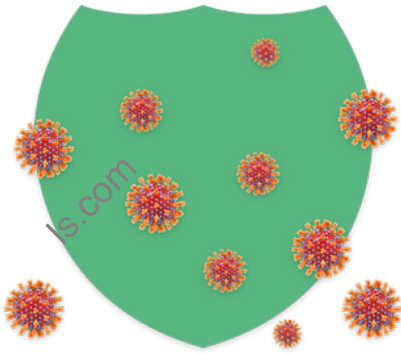

We will follow all health and safety rules. We want to do even better. We want our services to be safe and caring.

We keep our workplace clean and safe. We look for risks and make them smaller to stop harm and injuries.

Our staff get training in important areas like first aid and fire safety. We also teach them about stopping infections and handling medicines

We have strong rules to stop infections. We follow the latest health advice. We also have ways to report and learn from any problems or near-misses.

We make sure all equipment is safe to use. We talk openly with everyone to keep improving safety. We want everyone to feel safe and heard.

We have rules to keep everyone safe at work. We check risks, plan for emergencies, and want everyone to act safely and responsibly.

We want to be better at health and safety. We listen to feedback. If you have worries, tell us, and we will listen.
